Projects

A SMART HYDROPHONIC PLANT DISEASE DETECTION SYSTEM-major final year project

Our Smart Hydroponic Plant Disease Detection detects diseases early, enabling timely intervention to optimize yield and sustainability in indoor farming. I involved in designing and developing user interfaces for data input and visualization for processing and analyzing data, and creating a platform for sharing insights and recommendations with stakeholders.

ICONIC-CARS

Gained practical exposure by creating a responsive website for car showroom that involves designing and coding the site to adapt seamlessly to various devices and screen sizes. They ensure smooth navigation, optimize performance.

FRAGRANY-WHISPERS

Developed a static perfume website with good accessibility, integrated content and maintains the site for a smooth user experience.

BOOKSKEY

Created a static website to showcase book titles, author names, and descriptions, along with search filters, detailed book pages, personalized recommendations, and user reviews to help readers discover and choose their next read.

Internship

CODSOFT Internship -Web Development(current intern)

On my web development internship at CodSoft, I am exploring and enhancing my perspective of web development. I contributing my role as a front-end developer involved in designing user-friendly interfaces.

Skills

Programming in JAVA

HTML,CSS

Java Script

Good Communication

Personal Strengths

Self Observed

Patient good listener

Adaptable

Achievements

Paper presentation titled "Alcohol detection and vehicle stopping system" at UPAGRAHA'22

Sri Venkateswara Engineering College

Paper presentation titled "Switching Devices Using IR remote technology" at IMPULSE 2023

Chennai Institute Of technology

Workshops

Attended workshop at INDUSTRY 4.0

Attended workshop at Graphic Design in Impulse 2023
